

What to do with an egg in minecraft

Continue

While they're not the eggs that are left by a bunny, these neat Minecraft Easter eggs are sure to give you a smile. Here's how to find the little secrets hidden in Minecraft. You may already know some of these Easter eggs if you're an avid player. If you think you know them, test your knowledge. If you don't know any of these, let's get learning! If you want to learn how to speak like a pirate, change the language setting in Minecraft. With 76 languages to choose from, only two are based around comedy. The Pirate Speak option in the Minecraft Language settings changes the names of items, mobs, and descriptions in-game. In Pirate Speak, torches are called Rod o' Flames, a Diamond sword is known as the Bejewelled Cutlass, and the enchantment Depth Strider is called Mermaid Legs. When choosing Pirate Speak as your desired language, you are sure to get some laughs. If you're interested in music, anything technical within audio and visual, or want to be fascinated with something you've never experienced, the spectrogram of the C418 Disc 11 song will quickly grab your attention. A spectrogram is a representation of frequencies of sound in a visual manner. At times, these various representations are completely intended and show images that are designed by the creator. There's a familiar face in the C418 Disc 11 spectrogram. That face is Steve's. With a large box that resembles his face with eyes and a nose, it's very clear it's him. On top of seeing Steve's face, you will see the numbers 1241 to the right. While it is unclear what those numbers mean and represent, the numbers are written in the normal C418 type of font. Maybe these numbers are representative of something that may come in the future, but for now, not much is known about them. Naming a sheep in Minecraft jeb\_ with an anvil and a nametag results in the sheep pulsing all the colors of the rainbow. This sheep was added in the 1.7.4 update of Minecraft. Whatever color the sheep's wool is before applying the nametag is the color of wool that the sheep will drop upon shearing. The Rainbow Sheep has many names but is also commonly referred to as The Job Sheep or Disco Sheep. Like The Rainbow Sheep, making a mob upside down follows the same pattern. Naming a mob in Minecraft either Dinnerbone or Grummm causes the mob to flip upside down as if it is sliding across the ground. To name the mob either Dinnerbone or Grummm, use a nametag and an anvil. This small update is in reference to Dinnerbone's Twitter avatar. When Minecraft is launched, yellow text shows alongside the logo. Generally, every new occurrence of loading the title screen displays a new phrase on the screen. Every year on the first of June, Minecraft's splash text will state, "Happy Birthday, Notch!" This nod was added by Notch himself and is fairly neat to see. Reminding everyone of the video game's creator, this splash text Easter egg is an extremely cool way to celebrate his day of birth. When a rabbit is named Toast with a nametag and an anvil, the rabbit's skin changes to a black and white texture. Naming the rabbit Toast doesn't have any behavioral changes and is for cosmetic effect. Many players were confused with Toast's addition to the game, wondering what the name was a reference to. In 2014, Reddit user xyzen420 made a post to the *nr*/mincraftsuggestions subreddit in regards to his girlfriend's missing rabbit named Toast. Asking Mojang to consider putting his girlfriend's rabbit into the game, they accepted. Toast's addition to Minecraft was very heartwarming and very special for two people. To anybody who's ever played Age of Empires II: The Age of Kings, a potentially noticeable reference has made its way into Minecraft. The Evoker, Minecraft's enigma of a mob, has a very specific reference to Priests from the game mentioned previously. In Age of Empires II: The Age of Kings, Priest units would yell a sound along the lines of "WOLOLO!" while converting enemies to their side, changing their color and team preference. Evokers have followed suit, screaming the exact "WOLOLO!" from Age of Empires II: The Age of Kings any time a blue sheep is near. When the Evokers make their chant, the sheep's color will swap to red. Since Age of Empires II: The Age of Kings was developed by Microsoft Studio's Ensemble Studios, the sound was allowed into Minecraft as Mojang was purchased by Microsoft. There are plenty of interesting Easter eggs that have been introduced into Minecraft over the years of development. Hopefully, as time progresses, more will be added. Thanks for letting us know! Get the Latest Tech News Delivered Every Day [Subscribe](#) Tell us why! Eggs are one of the most essential ingredients in all of the culinary arts. Not only can they be eaten alone, they are used in all kinds of recipes, like sauces, desserts, cakes, and breads. But eggs are not just one thing. There are many different types of eggs. Here's an overview of all the different ways to cook eggs, as well as all the information you need to buy the eggs you want. There are numerous ways to prepare eggs, either alone or with other ingredients. Here are some of the most common. Eggs are also used in emulsified sauces like mayonnaise, Hollandaise and others. You've seen the eggs from your store are described as "Grade A," or possibly "Grade AA." But what does that mean, and are there any other grades? The U.S. Department of Agriculture grades eggs sold to consumers, and awards three different grades, AA, A, and B. These grades are based mostly on the thickness and firmness of the whites of the egg as well as how round and high the yolks are, and these attributes are largely linked to freshness. The fresher the eggs, the higher and rounder the yolks will be, and the thicker the whites. As an egg ages, the yolks will be flatter and the whites will be more runny. Grade A eggs are very high quality, while AA are the highest quality, meaning that their appearance is almost perfect. This matters most in preparations where you see the whole yolk, such as with poached or fried eggs. Grade A is the one sold most commonly in stores, but you can also find AA eggs. How common they are depends on where you live. Iowa, Ohio, Indiana, Pennsylvania and California are the top egg-producing states, so if you live near those places, you might have better luck finding Grade AA eggs. Grade B eggs have flatter yolks and runnier whites. They're seldom sold in stores, but end up being used to make liquid, frozen, and dried egg products. The USDA categorizes hen eggs into six sizes, which are based on the weight of the egg minus the shell. The sizes most commonly sold in stores are medium, large and extra-large. Jumbo: 30 oz. (63 grams)Extra-large: 27 oz. (56 grams)Large: 24 oz. (50 grams)Medium: 21 oz. (44 grams)Small: 18 oz. (38 grams)Pee wee: 15 oz. (32 grams) A single large egg (50 grams) provides around 70 calories, along with 6 grams of protein, 5 grams of fat, and less than a gram of carbs. It also provides various vitamins and minerals, including: Vitamin AVitamin B2Vitamin B5Vitamin B9Vitamin B12Vitamin DCholinelronPhosphorusSeleniumZinc Most of the nutrients are contained in the yolk, while the white is mostly protein. Have you ever wondered why the shells of some eggs are white and others are brown? It's simple: white eggs come from white hens and brown eggs come from brown ones. Other than the color of the shell, brown and white eggs are identical in every way. Brown eggs sometimes cost a bit more because brown hens are larger and require more food to produce an egg. Conventional eggs are typically just labeled "Eggs," but there are a few designations that you might also see on egg labels. Cage-free: Cage-free eggs come from hens that are free to walk around the hen house, as opposed to conventional eggs, which come from hens that are kept in small cages. There is no requirement for any specific minimum amount of space, they're just not kept in a cage. Free-range: Same as cage-free, but the hens must have access to an outdoor area. Organic: Organic eggs are required to come from chickens that are fed certified organic feed, and are both cage-free and free-range. Omega-3: Eggs with labels claiming "Omega-3 enrichment" come from hens that have been fed a diet rich in sources of omega-3 fatty acids, such as flaxseed oil, linseed oil, and kelp. Pastured: Eggs labeled "pastured" come from hens that walk around in open fields and woods, foraging for food, and going back into a hen house at night to roost, nest, and lay eggs. These eggs usually come from small farms and are often available at farmers markets and other direct-to-consumer methods. And in case you thought the only eggs you could eat were from chickens, think again. The eggs of ducks, turkeys, geese and even quail are sometimes available in stores. Duck Eggs: Much like chicken eggs but with a richer, creamier flavor. Quail Eggs: About the size of a peewee chicken egg, quail eggs are often eaten in Japanese and Chinese cuisines. Turkey Eggs: Larger than chicken eggs. Not usually sold in stores, but might be available from farmers. Goose Eggs: About twice the size of chicken eggs. Lots of eggy flavor. Keith Scott Morton We revised this summer picnic favorite by adding a touch of the Middle Eastern spices fennegreek and coriander. Cayenne pepper and a dash of hot sauce give these eggs an extra kick. Advertisement - Continue Reading Below 12 large hard-cooked eggs 1/2 c. mayonnaise 2 tbsp. mayonnaise 1/2 tsp. Tabasco sauce 2 tbsp. finely diced cornichon or dill-pickle relish 4 tbsp. finely diced onion 2 tbsp. finely chopped fresh parsley 2 tsp. ground coriander 1 tsp. ground fennegreek 1 tsp. salt 1/4 tsp. ground red pepper This ingredient shopping module is created and maintained by a third party, and imported onto this page. You may be able to find more information about this and similar content on their web site. Make the filling: Slice eggs in half lengthwise and remove yolks; set egg whites aside. In a medium bowl, use a fork to mix the yolks, mayonnaise, and Tabasco together. Stir in the cornichon, onion, parsley, coriander, fennegreek, salt, and red pepper.Fill the eggs: Fill a large zip-top plastic bag with the yolk mixture. Cut one corner of the bag to make a small hole (about 1 inch in diameter). Squeeze about 1 tablespoon of the filling into each egg-white half. Cover and chill until ready to serve.
